

CUSTOMER WORK SAFE POLICY

WORK SAFE POLICY:

The Directors of Alpha wish to ensure that all members of staff, contractors and suppliers working with them are provided with a safe working environment at all times.

Should anyone at any time be concerned that a work activity is putting them or others at an unacceptable risk, they have the absolute right to stop working immediately, without fear of reprisal.

For example:

- ✓ You may not have received the correct training and do not feel comfortable carrying out the work;
- ✓ A safe system of work has not been established or discussed;
- ✓ The correct equipment or PPE has not been supplied;
- ✓ A tool box talk has not taken place.

Works must not re-start until:

- ✓ The problem has been resolved;
- ✓ Further risks assessment is carried out;
- ✓ Method statements are revised;
- ✓ A tool box talk has been completed to ensure all parties understand and agree on a safe way forward.

Any incident of this nature should be reported to the appropriate line manager who in turn will report up the line. If this is not possible, report directly to Alpha Cladding directors.

It is also our aim that any unsafe work method is reported whether works are under Alpha Cladding control or others.

All members of the Alpha Cladding team are encouraged to report unsafe working conditions or methods.

Safety must come first and all times.
